

Spot Question Number 03

1. Submission Requirements

- Submit your answer on or **before April 11 at 5.30 p.m.**
- Save your program as:
 ArrayOperations_YourIndexNumber.java
- Ensure your program:
 - Compiles without errors
 - Produces correct output
 - Is properly formatted and readable

2. Important Guidelines

- Handle invalid positions (avoid runtime errors)
 - Add comments to explain your code
 - Do not use advanced libraries (keep it basic)
-

01. Write a Java program to perform the following operations on an array:

1. Create an integer array with user input (size n).
2. **Delete** an element from a given position entered by the user.
3. **Update** an element at a given position with a new value.
4. **Search** for a value entered by the user and:
 - Display the index if found
 - Display "Element not found" if it does not exist
5. Display the array after each operation.
